Individual Contributions

Member	Modules / Code	Report Sections	Experiments	Slides	Other
Emin Huseynli ehuseynli96-ops	src/trees/decision_tree.py src/boosting/ada_boost.py src/boosting/samme_r.py experiments/run_all.py experiments/bonus_samme_r.py	§2 Decision Tree §3 AdaBoost	Exp. 1, Exp. 2	Methods (Tree / AdaBoost)	Repo setup, .gitignore, initial scaffolding
Ziyad Muradov thedarkstringg	src/bagging/random_forest.py src/boosting/one_vs_rest_adaboost.py src/utils/preprocessing.py src/utils/datasets.py src/metrics/evaluation.py	§4 Random Forest §6 Experimental Setup	Exp. 3, Exp. 4, Exp. 5	Results (RF / CV tables) Full deck assembly, intro / conclusion slides	requirements.txt, dataset acquisition (Kaggle CSV, verifying MNIST / Covertypes fetch) Report LaTeX assembly, figures pipeline, contribution report compilation

Member	Modules / Code	Report Sections	Experiments	Slides	Other
Ismayil Yusifli ismayilyfli	src/unsupervised/pca.py src/unsupervised/kmeans.py src/unsupervised/dbscan.py experiments/*.py (1-7) experiments/bonus_tsne.py experiments/commen.py	§1 Introduction §7 Unsupervised Conclusion	Exp. 6, Exp. 7	–	–

Sign-off

All three members reviewed and approved the final codebase, report, and experimental results via GitHub pull request review.

By submitting this report, each undersigned member confirms that the contributions listed above accurately reflect their individual work on this project.
